

# ***DIGIMIC***<sup>®</sup> mini

An entire conference system...

**brähler**

# ...from a single box!

Design made to order.

DIGIMIC mini is an easily operable, small-size conference management system. High-performance wrapped in a dazzling design. Compact, lightweight, quick to set up, and packing a powerful performance.

## How you benefit

- Simple to setup and operate, installed and ready to start in 5 minutes
- State-of-the-art digital conference technology
- Small smart-fit auto-locking connectors ensure easy cabling
- Connectable to existing PA system without requiring additional equipment
- Wireless remote control via PC with many additional functions
- Fully silent operation
- In a modern and timeless design – a highly presentable conference management system
- Easily expandable with increasing requirements

## 10 Conference Microphones

securely stored in a special-purpose container. The microphones only need to be popped onto the microphone stations – and that's it.

## 10 Microphone Stations

in a single box. Simply connect to the control console and add all additional microphone stations downstream in a row. Smart-fit auto-locking connectors ensure easy cabling. Since this is the flattest microphone station ever, it saves space in transport and in storage – without giving up any performance or diverse functionality.

## 1 Compact Control Console

small and smart. Only 20 cm in length and width and 6.5 cm in height. The entire conference management system can be set up in 5 minutes. The console is immediately ready for operation after being switched on and is easy to operate. It operates completely silently and can be connected to an existing PA system and, if required, can be remotely controlled via a PC.

## in 1 single box!

Made of aluminium. High-quality, heavy-duty, stackable, and lockable box.
