

The image shows a digital equalizer interface for 'elysia' by MUSEQ. It consists of two identical frequency response curves (one on the left, one on the right) and a central control area. Each frequency curve has five sliders for different frequency bands: Low, Bottom, Middle, Top, and High. The sliders are labeled with frequency values and gain levels. The central area contains the 'elysia' logo, the 'MUSEQ' brand name, and four buttons labeled 'Left', 'Warm', 'Warm', and 'Right'.
